THREADED FLANGES

Jade Special Metals is one of the finest distinguished manufacturers and distributors of Threaded Flanges, which are stronger and harder as compared to normal steel. Further, these Stainless Steel Threaded Flanges are available in diverse specification to suit the different requirements of our prestigious clients and at affordable rates. Meanwhile, Carbon Steel Threaded Flanges has several features like having Light weight, Ruggedness, Rust proof, Durability and so on. However, these Super Duplex Steel Threaded Flanges are not as challenging to corrosion as stainless steel. Typical applications of Alloy Steel Threaded Flanges include a lot of components for the chemical dispensation, oil and gas, marine, food and pollution control industries. Low down carbon content of Inconel Alloy Threaded Flanges lowers the risk of carbide precipitation to a great extent at the granule limitations during heat action.

SPECTACLE BLIND FLANGES

Jade Special Metals is one of the finest distinguished dealers of Spectacle Blind Flanges, which is known for its workability, formability, weldability and moderate strength. Stainless Steel Spectacle Blind Flanges makes the alloys extremely resistant to both embrittlement's from precipitation of sigma stage and to chloride stress-corrosion cracking. Meanwhile, alloy's chemical composition of Carbon Steel Spectacle Blind Flanges is designed to offer excellent resistance to a lot of corrosive atmospheres. The molybdenum and high nickel contents in Super Duplex Steel Spectacle Blind Flanges make the nickel steel alloy particularly crevice corrosion and resistant to pitting in plummeting atmospheres, whereas chromium suggests resistance to oxidizing media.
